Auriga wines are made from Sierra Foothill vineyards. This is the historic location of vineyards, which supplied the gold miners (49ers) with wine in the last century. The soils in the foothills are thin and the vines have to struggle to survive, resulting in intense concentrated wines. You can try our award winning Barbera, Sangiovese, Zinfandel and more in our dog friendly tasting room on Pleasant Valley Road.

# GRAPE VARIETALS

In El Dorado County, the vintner's strength is the land's terrain: hundreds of microclimates provide a broad range of temperatures, exposures and soils. When well matched, this topography provides an ideal location for the world's finest wine grapes, hailing from Bordeaux, the Rhône, Germany, Italy and Spain. That's what we call *"Right Grape, Right Place."*

RED.....30

WHITE.....32

## REDS

**AGLIANICO** (ahl-YAH-nee-ko) - A black grape grown in the Basilicata and Campania regions of Italy. In well-made examples of the wine, it can have chocolate and plum aromas.

**BARBERA** (Bar-Bear-ah) - A red Italian wine grape variety. Flavors can vary from plum and cherry, to undertones of sweet vanilla.

**CABERNET FRANC** (Cah-burr-nay-Frank) - A black grape variety originating in France. Depending on the growing region and style of wine, aromas can include tobacco, raspberry, bell pepper, cassis and violets.

**CABERNET SAUVIGNON** (Cah-burr-Nay-Sow-vee-nyon) - A red grape originating from Bordeaux. Cabernet Sauvignon tends to produce wines with black currant notes that can be accompanied by green bell pepper notes, mint and cedar.

**CARIGNAN** (Cah-reen-yawN) - A red Spanish/French wine grape variety. Carignan is only rarely made as a varietal wine, but the best examples can show characteristics of dark and black fruits, pepper and licorice - with spicy and savory accents.

**CHARBONO** (Shar-BOE-noe) - A red French wine grape variety. The wines often have a black fruit and plum aroma with flavor notes that can develop into leather or tar notes as the wine ages.

**CINSAULT** (SaN-so) - A dark-skinned grape variety traditionally used as a blending partner for Grenache, Syrah and Mourvèdre as part of the classic southern Rhône blend. Light red berries are the most commonly associated flavor descriptors.

**COUNOISE** (Coon-wahz) - A dark-skinned wine grape grown primarily in the Rhône valley region of France. Cunoise is often described as a peppery and spicy grape variety, but it also has hints of plum and wild berry (strawberry and raspberry) flavors.

**GRACIANO** (Grah-ee-YAH-noh) - A Spanish black-skinned grape variety that is grown primarily in Rioja. The flavors of Graciano wine are dark and concentrated, often showing licorice scents with a spicy element.

**GRENACHE** (Greh-nash) - A red wine grape also known as Garnacha, which most likely originated in Spain. Generally, it is spicy and berry-flavored. As Grenache ages, the wines tend to take on leather and tar flavors.
